The Commissions Secretary
Office of the Secretary
Federal Communications Commission
236 Massachusetts Avenue NE, Suite 110
Washington, DC 20002

Attention: Chief, Public Safety and Homeland Security Bureau

PS Docket No. 06-229, WT Docket No. 96-86

To Whom It May Concern:

Public Notice DA 07-4168 instructed every 700 MHz band public safety licensee, operating pursuant to a State License, to provide information concerning operational equipment installations that would need reimbursement for rebanding due to new rules adopted by the Commission in a *Second Report and Order*.

The State of California (the State) has been granted a 700 MHz license (WPTZ774) by the Federal Communications Commission to operate fixed, mobile and portable radio equipment within the geographic boundaries of California.

Although the public safety agencies of the State are actively planning to install operational equipment, starting August 30, 2007, the State does not have any narrowband base stations, mobile or portable radio equipment in operation in channels 63 or 68 (764-767/794-797 MHz), nor in the upper 1 megahertz of channels 64 or 69 (775-776/805-806 MHz) within the geographic boundaries of the State of California. Therefore, no funds will be required to reband 700 MHz radio for the State.

The information provided in this letter is complete, correct, and made in good faith.

Sincerely,

JAMES KIRSTEIN, P.E.
Senior Telecommunications Engineer
DGS - Telecommunications Division
(916) 657-6130
